

# **“Better Results, More Profits and Less Stress with Vantagepoint AI Software” Says Professional Trader Dr. Keith Wade**

Recently, professional trader and John F. Kennedy University instructor Dr. Keith Wade (PhD., Finance) reviewed VantagePoint for TradersWorld Magazine. Vantagepoint AI is the software company that developed the first artificial intelligence (AI) trading software in the world available to retail investors and traders. TradersWorld is the official magazine of Technical Analysis covering both classical and modern techniques. Since 1986 the magazine has covered the latest in technical analysis books, software and hardware. In the October 2019 edition, published a review of the Vantagepoint’s Artificial Intelligence Trading Software.

Dr. Wade, a seasoned trader who encompasses a formidable blend of knowledge and understanding of trading futures, forex, stocks, and exchange-traded funds, Dr. Wade found Vantagepoint to be a leader in the world of Artificial intelligence which is transforming every aspect of our daily lives – medicine, social intercourse, farming, household operation, automated industries...and now even your trading decisions. “When it comes to the financial world, Vantagepoint is the most powerful A.I. tool for trading that I’ve found.”

-Keith Wade, PhD Finance

***“When it comes to the financial world, Vantagepoint is the most powerful ai tool for trading that I’ve found.”***

***– Dr. Keith Wade, PhD Finance***

Over the last 30 years, the world has become interconnected on a global level. Traditional technical analysis believes that everything that is known about a stock is reflected in the current price and chart. But we know there are numerous connections and factors which affect a stocks price which cannot be seen or properly evaluated by traditional charting methods. Legend of Wall Street, Louis Mendelsohn, pioneered and patented a form of Intermarket Analysis that analyzes markets by looking at correlations between different asset classes. Rather than looking at each individual market or asset in isolation other strong relationships to the market or asset are being considered. These calculations are done with neural networks and machine learning that are proven to be up to 86% accurate identifying market movements one to three days in advance..

The power of Artificial Intelligence was once only the province of brokerage houses with floors full of cubicles and analysts. Vantagepoint Software is the first to let independent traders affordably use artificial intelligence to better their trading results. While many people think that an artificial intelligence tool that can predict the market sounds too good to be true, Vantagepoint Software users enjoy a window into the market’s future that helps to drive profits.
