## **Leading Plastic Nameplate Manufacturer Re-launches Website**

Toledo, Ohio (March 14, 2013) – Denbro Plastics, a leading [manufacturer of injection-molded, plastic nameplates](#), unveils a re-vamped and re-energized website located at [www.denbroplastics.com](http://www.denbroplastics.com).

Site changes feature enhanced content and redesigned format to provide a better overall user experience and enhance Denbro Plastics's already well-established position in the industry. The site's new look is intended to align Denbro Plastics's branding and image with their mission of providing world-class service, quality and delivery to their customers.

"We are very pleased and excited with the new design of our website," said Jack McKisson, owner of Denbro Plastics. "We feel the site does a good job portraying our vision and values and gives current and prospective customers an opportunity to learn more about us, our capabilities, our people and most importantly how we can serve their needs," he continued. "We are proud to unveil a new look at [denbroplastics.com](http://denbroplastics.com).

Denbro nameplates are engineered and manufactured for durability in harsh environments. Denbro nameplates are available with the Secure-A-Mount double-sided foam tape adhesive, mounting holes or both.

### **About Denbro Plastics**
