

# Blueberry Mask

Nourishing Recovery Blueberry Mask

AVAILABLE  
6 oz - Professional (BBBM6)

pH: 5.5  
Sunburn Alert: Contains AHA's that may increase skin's sensitivity to sunburn. Use SPF.

Pamper your skin with this clay, stem cell and peptide mask laced with a blueberry and vanilla antioxidant blend to leave skin looking even-toned and youthful. Bentonite clay extracts impurities without stripping the skin's moisture barrier. Acetyl Hexapeptide-37 restores the skin's barrier and enhances hydration while the plant stem cell, Globularia Cordifolia, helps reduce pro-aging agents and micro-inflammation. Palmitoyl Tripeptide-8 helps to protect skin against sensitivity and reduce the appearance of enlarged capillaries. Blueberry and vanilla extracts neutralize free radical damage and contribute antibacterial properties and light

Skin Type Indications	Directions	Benefits	Application
Sensitive Skin Reactive Skin Photodamage Dry Skin	After removing a treatment peel, apply thin layer (approximately 1 tsp) to face, neck and décolleté. Avoid eye area. Let this mask set for 7 to 10 minutes and perform hand and arm massage with Massage Oil. After 10 minutes remove thoroughly with a warm steamed towel. Steam is optional during mask application. <b>Upgrade tip:</b> Mix a treatment serum with Massage Oil and gently massage face immediately before applying this mask.	<ul style="list-style-type: none"><li>Gentle Mandelic acid increases skin cell turnover, brightening and softening skin</li><li>Reduces redness, swelling and inflammation</li><li>Nourishes and heals</li><li>Reduces appearance of fine lines and wrinkles</li></ul>	1 Time/Weekly

Key Ingredient	Function
Bentonite	Oil-controlling clay that extracts skin impurities. Absorbs toxins and purifies.
Resistem (Globularia Cordifolia Callus Culture Extract)	A botanical stem cell derived from the flower otherwise known as "leather leaf powder puff" that promotes an even skin tone, minimizes redness and enhances a natural glow. This stem cell helps reduce the level of pro-aging agents and micro-inflammation while rebuilding the skin's own defense system. Glycation was reduced by 64% , intracellular peroxides were decreased by 88% and SOD was increased by 36%.
Neutrazen (Palmitoyl Tripeptide-8)	A neurocosmetic tripeptide designed to prevent and reverse signs of neurogenic inflammation. This tripeptide calms and soothes irritated skin and helps maintain and restore a normal skin sensitivity threshold. It reduced UVB-induced inflammation up to 32%, reduced capillary size (redness) up to 51% and edema (swelling) up to 60%. After 1 week of daily use, 83% of study participants experienced reduced irritation and after 4 weeks, 91% saw improvement in redness.
Diffuporine (Acetyl Hexapeptide-37)	Enhances the expression of proteins (called aquaporins) involved in water transport to improve hydration in the basal layer of the epidermis as well as barrier function. Enhances aquaporin 3 (AQP3) up to 96%, a membrane protein that declines over time with chronological age and photo damage that's involved in water transport throughout the skin and barrier function. It improves the water flux from the basal layer of the epidermis to the top layer stratum corneum and maintains barrier integrity. Skin hydration is enhanced by 61% after 56 days and collagen I synthesis improved by 61%.
Blueberry	A superfruit and exceptional antioxidant rich in anthocyanins that suppress free radicals and stabilize the collagen matrix.
Vanilla Planifolia Fruit Extract	Antioxidant, astringent, antibacterial, moisturizing ingredient.
Shea Butter	Soothing moisturizer and protective antioxidant derived from the West Africa Shea tree.
Sodium Hyaluronate	Natural Moisturizing Factor (NMF) is a humectant that keeps skin hydrated and plumps skin to help reduce the appearance of wrinkles. Binds itself 1000 times in water.
Leuconostoc/Radish Root Ferment Filtrate	Lactobacillus is capable of restricting the growth of microorganisms by acidifying the environment and produces novel antimicrobial peptides called bacteriocins capable of providing broad spectrum antimicrobial protection.

**Ingredients:** Water, Bentonite, Glyceryl Stearate, Sodium Hyaluronate, Cetyl Alcohol, Glycerin, Hydrogenated Castor Oil, Ricinus Communis (Castor) Seed Oil, Magnesium Aluminum Silicate, Leuconostoc/Radish Root Ferment Filtrate, Stearic Acid, Butylene Glycol, Fragrance, Propanediol, Globularia Cordifolia Callus Culture Extract, Montmorillonite, Dimethicone, Titanium Dioxide, Vanilla Planifolia Fruit Extract, Caprylyl Glycol, Chondrus Crispus (Carrageenan), Butyrospermum Parkii (Shea Butter), Vaccinium Angustifolium (Blueberry) Fruit Extract, Kaolin, Acetyl Hexapeptide-37, Panthenol, Dextran, Lecithin, Palmitoyl Tripeptide-8, Ethylhexylglycerin, Mica, Citric Acid
