For Medium to Large Contractors

Simplifying and Standardizing the Cost Proposal Process

Proposal teams use PROPRICER™ CE to efficiently create and manage accurate cost proposals. Our customers are maximizing proposal production speed and efficiency by offering these teams a secure, collaborative environment with sophisticated "What-if" capabilities and comprehensive custom reporting to meet individual proposal requirements. Summarize data by WBS, CLIN, phase, option years, work package and organization structure, to name just a few. And PROPRICER™ CE is scalable to meet any sized team at a single site or at various remote locations.

PROPRICER™ CE is designed to provide cost proposal analysis in minutes, rather than hours. Eliminating the need for complex spreadsheet templates, companies are experiencing the many benefits of utilizing a proposal pricing solution that's easy to learn and industry respected. Use PROPRICER™ CE to support the way you do business.

A PERFECT FIT

A software solution that enables proposal teams to securely input, review, analyze, and submit cost proposal data seamlessly to their government customers.

Estimator

Functional departments directly access and estimate appropriate portions of the cost proposal

As a companion product to PROPRICER™ Contractor Edition (CE), Estimator allows functional groups to enter their estimates directly to a PROPRICER™ proposal (or to be created in a 'staging area' for analysis before merging), providing for the spreading of resource hours/dollars, BOE text creation or attaching, and data manipulation to arrive at desired results. This allows pricing teams to be made part of the pricing review process seamlessly. Exporting and importing is a thing of the past. Estimator provides accurate, standardized estimates while offering the flexibility needed for specific proposal requirements. See how this powerful, comprehensive estimating capability seamlessly interfaces with PROPRICER™ CE to give your proposal teams an unparalleled competitive advantage throughout the proposal process.

KEY BENEFITS

- Bring Estimators, Pricing, Procurement, Contracts, Finance, and Management into the same real-time data set to streamline your proposal process.

- Ensure accurate RFP & FAR compliant proposals with global rates, material costs, and a centralized pool of resources to develop proposal standards.

- Maximize output speed and flexibility with a custom report writer to meet any client reporting requirements.

- Decrease proposal development time with easy-to-use, target pricing features, and detailed "what-if" analysis.

- Allow functional groups to make cost estimates simply and accurately with a single point of entry.

- Create a live, collaborate staging area for estimates so teams can see how the proposal develops and identify and remove duplicates.

- Identify all tasks with a specific basis of estimate (BOE) that relates directly to any WBS, CLIN, or SOW.
