

FOR IMMEDIATE RELEASE:

NOVEMBER 19, 2010

SAN DIEGO, CALIFORNIA

TECHLAW LLP is pleased to announce the addition of ROSS A. EPSTEIN, ESQ. as a partner of the firm.

ROSS A. EPSTEIN is a seasoned practitioner whose practice centers on the development of intellectual property assets for technology-based businesses with an emphasis on corporate transactional services, anti-counterfeiting and other IP enforcement, licensing, corporate governance as well as international transactions and structure. Mr. Epstein brings an unusual entrepreneurial perspective to the practice of law, often serving as general counsel and sitting on the boards of directors for his clients, due to his hands-on experience in business as a founder, President and CEO of BCH Communications in Poland, Hungary and the Czech Republic. Mr. Epstein developed BCH communication into a multi-million dollar telecommunications/internet business and also filled the in-house counsel role. This experience combined with his prior business litigation practice makes him uniquely qualified to advise and counsel growing and established companies. Mr. Epstein received an AB degree in History from Princeton University in 1983 and a Juris Doctor degree with honors from Boston University School of Law in 1987. Formerly, Mr. Epstein was a partner with the Nath Law Group. Ross brings a wealth of experience and expertise, and adds new dimensions to the firm's growing practice. Mr. Epstein can be reached at Ross@TechLawLLP.com

TECHLAW LLP is a boutique intellectual property law firm based in Southern California. Techlaw's practice covers all areas of intellectual property and business law including patent and trademark prosecution, due diligence, opinion practice, licensing, corporate transactional work and litigation.
