New Website & App Aimed at Increasing Healthcare's Patient Experience

[Glendale, AZ] –

Arrowhead Health Centers (AHC) is proud to unveil their new website and app that is bridging the gap in communication between healthcare facilities and their patients, poised to help improve the patient experience. From billing, scheduling, referrals and instant chat online, to the convenience of having a medical appointment over the phone, AHC is embracing technology to help enhance the way healthcare is delivered.

“At the heart of our culture is the principle, Put People First & People Get Healthy™,” quotes Ken Levin, CEO of Arrowhead Health Centers. Levin continues, “This kind of culture comes from having employees and providers completely committed to this single purpose, which in turn, helps enhance our patient experiences inside of the clinic walls, and now online as well.”

AHC's commitment to putting people first has recently been recognized by the National Center for Quality Assurance, who has awarded them a Level 3 Patient Centered Medical Home designation through 2018. Arrowhead Health Centers offers every major healthcare model under one roof, with 6 convenient locations across the state, improving patient outcomes and delivering on the highest quality of care: *Primary/Family Care, Pain/Injury Management, Physical Therapy, Chiropractic, and Massage as well as specialty Osteoarthritis and Peripheral Neuropathy programs.* For more information on Arrowhead Health Centers please visit the links below:
