INQUIRY

To my elected representative

ENOUGH TALK

The buck stops here.

I WANT ANSWERS!

Dear _____

Sending you this Inquiry is just one of the steps I'm taking to put an end to the incredible lack of concern for true American interests that leaves my voice unheard and my personal interests forgotten.

Unless I hear back from you with answers, don't count on my vote. Count on the fact that I will tell my friends that they have no right to gripe about high gas prices, and why a handful of multinational corporation are getting even super richer unless they get up and do what I'm doing to find out where you stand.

- True ■ False 1. There is a connection between Big Oil's corporate lobbying & the high cost of gas for millions of Americans.
- True ■ False 2. Reducing foreign oil purchases will speed growth of new made in USA alternative energy
- True ■ False 3. Voting in favor of Big oil is nothing more or less than corporate welfare at the expense of the average taxpayer.
- True ■ False 4. Politicians that supposedly work for the public have a "conflict of interest" by accepting campaign funds from Big Oil companies?
- True ■ False 5. You have an obligation to tell the people you represent why you vote in favor of Big Oil corporations not the public.
- True ■ False 6. You are doing your very best to get rid of Big Oil's influence now and in the future.
- True ■ False 7. An organized people's group can make their Congresspersons cringe by demonstrating a). voter clout and, b). using America's free enterprise system to match special interests control on elected officials.

IF, you answered six or more questions "True" **THEN**, what are doing to insure all the people you represent you are working for their interests?

Thank you,
