*51,150 trees have been planted thanks to your support!*

*This village project is being implemented to save the homes and way of life of people in communities across the globe that have been devastated by deforestation and, increasingly, global climate change. This certifies the planting of 51,150 trees, thanks to your support. These fast-growing, permanent, beneficial trees will help to protect these fragile and eroded lands and assure that families can continue to live in dignity and in harmony with the natural resources of their lands.*
