Hidden knowledge and state secrets comprise the “alternative narrative” described in *Future Esoteric*, which examines the flaws of mainstream society, and presents radical solutions to today’s social, scientific and economic issues

SAN FRANCISCO: Things are not always as they appear. For the past century forbidden subjects such as UFOs, human abductions, secret space programs, suppressed free energy devices and other fantastic notions have tested the human mind, forcing it to decipher fact from fiction. But is there a common thread? As sites like WikiLeaks and their founders try to unveil war secrets and covert black operations, international governments have little-by-little begun exposing what they've tried for years to keep hidden. Chronicling what he calls the “alternative narrative,” Brad Olsen gets down to the middle of it all.

Organized into three sections (Secrets, Cosmos and Utopia), *Future Esoteric: the Unseen Realms* by *Ancient Aliens* guest Brad Olsen (CCC Publishing, April 2016) examines the flaws in modern history and looks at how ancient esoteric teachings, coupled with accelerated scientific advancements, can be used to help change the

dead-end course we humans are running ourselves into. Looking at several alternate paradigms, whether they deal with crop circles, immigrant Nazi leaders to the United States after WWII, or out-of-this-world creatures like Grey aliens, Olsen comes to the conclusion that we have been among the supernatural for centuries; these creatures and advanced military technology have been used as experiments, but this potentially world-changing info has been denied to the masses for the purpose of control.

Through exploration and the integration of cutting-edge science with ancient wisdom, Olsen believes the dawn of our new society is faced on the one hand with global tyranny, or we can overcome the oppression and advance towards universal abundance and enlightenment. Without government and media manipulation this can be possible, and the Golden Age will be attained with the rapid advancement of human consciousness.

“Brad Olsen has done a vast amount of searching to come up with Future Esoteric, and putting it together coherently and beautifully, he has saved us all a ton of time just when we are running out of it. Dots are connected and threads knit together, revealing an intentional predicament and leading in the direction of practical, love-based solutions.” –Foster Gamble, *Thrive*
