Fischer Identity Named Product Leader

November 14, 2019. Naples, FL – Fischer Identity has been named a Product Leader in KuppingerCole's Leadership Compass for IdaaS - IGA.

Fischer Identity has proven through the years to be an innovator and leader in the [Identity-as-a-Service® market space](#). With the first full-suite IGA customer hitting the cloud in 2006, Fischer set the bar for how IDaaS should work and proved to the world that, in fact, there was a market for security, Identity and governance services in the cloud.

Fischer's leadership position holds true 13 years later with the release of this year's KuppingerCole Leadership Compass for [Identity as a Service \(IDaaS\)](#) - IGA which focuses on [Identity Administration](#), [Access Management](#) and [Access Governance](#) capabilities of each vendor they evaluate.

“Being named a Product Leader in the 2019 KuppingerCole Identity as a Service (IDaaS) – IGA report is a testament to our continued focus and investment in our product. Our unique and distinguished IdaaS delivery model continues to provide our customers with success, stability and control over their IAM Program. We are a product and customer driven organization and we will continue to provide the features, functionality and delivery model that is required to deliver cloud-based Identity services” –Andrew Sroka, President & CEO of Fischer Identity

KuppingerCole expects vendors to support a wide range of features and capabilities including directory services & integration, flexible user onboarding, breadth of connectors, depth of connectors, [provisioning flows](#), workflow capabilities, user self-service, mobile interfaces, [access request management](#), access reviews, access analytics, SoD management, flexible entitlement management, baseline [IDaaS access management capabilities](#), central administrative UI, strong set of APIs, hybrid support and a modern architecture.

About Fischer Identity

Fischer Identity's mission is simple: “Your Success.” Fischer's IGA solution is mature and fully integrated, providing dynamic Identity lifecycle management with platform independence - [On Premise, IaaS, SaaS Hybrid and Private Cloud](#). Fischer Identity engages with their clients as partners, providing a framework that offers secure access to the right Information at the right time for the right reason. Fischer never stops innovating, evolving both their products and methodology. And they are never satisfied since they know they can continue to make IAM and IGA easier to acquire, deploy, and use.
