

LEVERAGE MACHINE INTELLIGENCE

Advance your smart factory with Prophecy IoT® technology for next-level manufacturing.

Prophecy IoT® powers your smart factory giving you the ability to listen to your machines.

For several years, we have all been reading and learning about the next revolution within the industry. Industry 4.0 some call it. Industrial IoT. Smart Factories. What does all this mean? Well, with Prophecy, what it means to us is enabling you to have a smart factory, finally giving you the ability to listen to your machines. For quite some time, your machines have been talking or wanting to talk. Now, we finally have a tool in which you can listen to what they're telling you and give accurate real time information about machine health, manufacturing performance, scrap, downtime, and unplanned downtime. And finally, the ability to accurately calculate your OEE, all while integrating that back into your ERP system. Prophecy IoT® enables the ability to connect to any number of machines or devices through our automation engine with metrics up to 10,000 measurements per second. Prophecy IoT® gives you the ability to listen to your machines and take action on what it is they are telling you.

Prophecy IoT® enables:

- Machine Health
- Real-time Operation Metrics
- Visibility of Production Goals
- Manufacturing Performance
- Productivity and Efficiency
- Quality & Defects
- Automation & Accuracy of Data
- Alarms & Notifications
